

GROUP 00

ALBENGA

THE PROTEIN MAKER

- **EXCELLENT YIELD**
on the 00 maturity group
- **HIGH PROTEIN CONTENT**
between 42 - 44 %
- **ADAPTABLE USE**
end of 00 group with high yield potential

Available with seed applied solution

CHARACTERISTICS

Maturity	End of 00
Growth type	Indeterminated

MORPHOLOGY

Flower colour	Purple
Hilum colour	Yellow
TKW	Medium
Plant height	High
First pod height	Medium-High

AGRONOMY

Soil coverage	8
Ramification capacity	8
Early vigor	7
Drought tolerance	7
Standability	7
Pod shattering	8

1-3 sensitive – poor | 4-6 medium – good | 7-9 tolerant – excellent

YIELD & QUALITY

Oil content	Medium
Protein content	41 - 43 %

CULTIVATION

Density at harvest	55 - 60 Plants/m ²
Second sowing	Yes

SOWING ADAPTATION

	Early	Optimal	Late
Adaptation	++++	+++	++

The shelf life of the inoculum is 80 to 90 days with a storage temperature of 18°C. Lower temperature storage has a positive impact on the lifespan of rhizobia on seeds. We recommend a temperature below 25°C for storage and transport of pre-inoculated seeds. Plan for a double inoculation in the case of a plot that has not had soybeans for more than 5 years and in the case of sowing in erosion.
